

Ancillary Equipment

Klaxalarm Terrier

Features

- Battery operated unit
- Electronic sounder
- Rugged metal construction
- Simple to install and operate
- Units can be linked to form a complete system
- Low battery warning

Overview

The Klaxalarm Terrier is a stand alone, self-contained fire alarm designed for use in small retail, industrial or temporary buildings as well as construction sites, camp sites or marquees. In addition it can be used as a temporary alarm when the main fire alarm system is under maintenance.

Several units can be interlinked to provide additional coverage so that when one call point is activated, all of the other units sound. When fitted with LR14 batteries, these units will operate in standby mode for over 12 months. An audible warning is emitted when the battery power level becomes low.

Please note units do not come with batteries.
