

Ancillary Equipment

Floor Mounted Door Retainer

Features

- 200N or 500N holding force
- Zero residual force
- Robust aluminium construction
- surface cable entry
- Manual release switch
- Supplied with keeper plate

Overview

Floor mounted door holders are designed to provide convenient access by holding doors open and releasing them when an alarm is triggered.

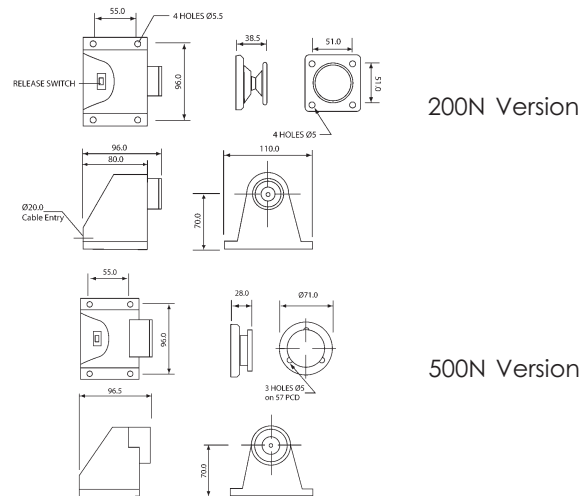

The unique design provides maximum protection for areas subject to vandalism or accidental damage. It is comprised of rugged cast aluminium, a holding magnet with integral ejection pin and a manual release switch.

Cable entry can be through the base or through a 20mm hole provided for surface mounted conduit or pyro.
