

Ancillary Equipment

Universal

Features

- Floor, wall and ceiling mounting
- 500N holding force
- Zero residual force
- Robust structure
- Supplied with keeper plate

Overview

Universal door retainers are designed to open fire doors for convenient access through busy doorways and release them when the central alarm is triggered.

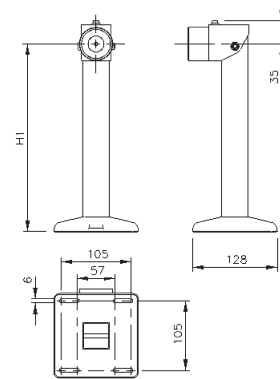

This type of door holder magnet can be used for a variety of applications due to its rugged and versatile design. It can either be floor mounted or ceiling mounted depending upon the requirement. By turning the magnet through 90° it converts to a wall mountable configuration.

The stand and adjustable head are fabricated from steel providing a very rugged and robust structure. A moulded cover is supplied with the unit to conceal mounting fixings once the holder is fitted.

The length of the stand can easily be shortened on site.

Applications

- Hospitals, Offices, Hotels and Nursing Homes

- Fire
- Security
- Industrial
- Railway/Marine
- Hazardous Area
- Public Warning

Part No.	Colours	Holding Force	Residual Holding Force	Voltage	Current
